

XM Radio is the best service to come along in many years, and has helped millions to escape the corporate radio stations that play the same songs over and over and over. The XM traffic and weather service is GREAT to have, especially for me when I travel through big cities, such as New York City. I can turn my XM Radio to the New York traffic & weather channel and INSTANTLY find out what if there are any traffic jams or bad weather to worry about. This immediate access to information can be critical, since I can plan an alternate route to get around the problem area. Please don't side with corporations that have already ruined FM...and let them do the same to XM.
